## Fax to Email

Save money and speed up business efficiency. Confidential, effective and green fax to email solution with either a new number or porting of your existing line.

- Instant, confidential delivery of faxes via email
- Free up your phone lines - no hardware or lines required
- Receive faxes while out of the office via mobile email
- Single fixed rate - no call charges
- Save on fax consumables and energy - no paper, toner or power

### How it works

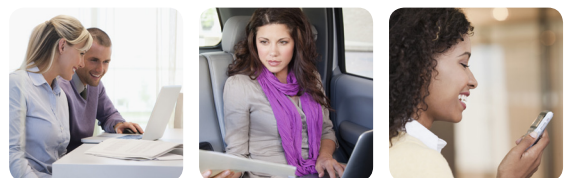

Fax to Email provides small businesses with a confidential, efficient and green fax to email solution on either existing or ported geographic (01, 02, 03) and non-geographic numbers (0844, 0871).

Along with a choice of numbers and the ability to move costly existing fax machines to this service, you will also benefit from an online management portal, allowing complete management of fax numbers and email addresses, along with the ability to establish specific user or department access and assign corresponding fax numbers to them.

The online portal enables faxes to be archived in a secure environment, thereby reducing the costs associated with printing and storage, and ensuring your faxes are always available wherever you are.

Through the number published as your fax number and registered with the service, any faxes received can be automatically converted to a PDF file and sent to a nominated email account, as well as being visible through the online portal.

All of this is available at a single fixed monthly rate with no call charges!

## Inbound services: Fax to Email

### Your choice of numbers

Using Fax to Email you can take advantage of any of the following numbers at a fixed one-off price that includes all call charges:

**01, 02, 03** Geographic Numbers

**0844** Non Geographic Numbers

**0871** Non Geographic Numbers

Alternatively, you can port your existing services to take advantage of this offering over your existing base.

### Benefits

- No need to pay for hardware or phone lines - reduce the number of lines at your premises.
- No need to pay for ongoing maintenance, toner and paper.
- A green fax solution - no paper waste, no ink related pollution, no power consumption, reuse existing fax equipment as a scanner.
- Instant establishment and delivery of faxes.
- Establish specific user and department access and assign fax numbers to these users.
- Easily and securely archive and share information with colleagues online.
- Receive faxes off-site and through mobile email.
- Available with any of our products.
